At a glance

How the four plans differ

Each plan includes everything in the plans below it. Prices are for prepaid term passes paid by bank transfer, in Korean won; the longer the period, the lower the monthly rate.

Free

₩0

27 rows without signing up · 3 more when signed in

- 4-hour and 12-hour support, resistance and expected range
- Fear & greed · kimchi premium · macro calendar
- Signed in: a watchlist (50 per market) · the 13-lesson beginner course

Lite

₩49,000 / mo

~~₩39,000~~ / mo on a 12-month pass · 26 new rows

- Support and resistance on daily, 3-day, weekly and monthly charts
- Today's read · daily market report · bar-close briefings
- DM when a watchlist symbol reaches your price (3 symbols a day)

Standard

₩87,000 / mo

~~₩69,000~~ / mo on a 12-month pass · 19 rows on top of Lite

- All-symbol level table + reach and break alerts
- Desk · derivatives · smart money · accumulation/distribution
- The 22-lesson advanced course

Premium

₩119,000 / mo

~~₩99,000~~ / mo on a 12-month pass · 4 rows on top of Standard

- Live commentary by the operator (Telegram, in Korean)
- Real-time Telegram push
- Premium-only page · wallet P&L card

> **Paying from outside Korea is not possible yet.** Web payment is a prepaid bank transfer to a Korean bank account, and the card option is a Naver Premium Contents subscription — both are for residents of Korea. Payment methods for members outside Korea are being prepared. Until then you can sign up for free and use the free screens (4-hour and 12-hour support and resistance, the beginner course and a saved watchlist).

> The row counts in this guide divide the 79-row "full content comparison by tier" on the pricing page. The 27 rows open without signing up are not counted as a benefit of any plan, and the 3 rows that only need a sign-in are listed under Free. Add the addresses in the "Where to see it" column after www.marketsurfer.co.kr.

Before you choose a plan

- **Everything in Lite and Standard can be seen on the web.** You can use them with the website alone. Personal alerts such as a price reach, and expiry notices, are sent as Telegram DMs, so you need to connect Telegram to receive them.
- **Premium adds a person and immediacy.** The operator's live commentary happens only on Telegram and is given in Korean, and what you would otherwise open on the web reaches you on Telegram the moment it is published.

- **Term passes do not renew automatically.** Payment, renewal and refunds are covered in “User guide 3 · Payment, renewal and refunds”.

Free

Without signing up, and signed in

These pages open without paying. You are asked to sign in only when you save a watchlist symbol or open a lesson.

> **What is in English and what is not.** The website pages, buttons and guides open in English at the addresses starting with **/en**. A few things are still Korean only: published reports and the publication library, Telegram channel posts, briefings and alert messages, and the operator's live commentary. If your Telegram app language is not Korean, the bot answers the start, account-linking and partner commands in English. Some labels, sector names and symbol names on a few pages (for example the market dashboard, heatmap and sectors) also still appear in Korean.

On the English site you sign in with a Google account. Email sign-in is not available at the moment, and Kakao sign-in is offered only on the Korean site.

A sample way to look around in your first three days · order and use are up to you

Day 1

See where the price sits

- Open Bitcoin from the symbol search and read the sentence at the top `/en/live/BTC`
- Switch between the 4-hour and 12-hour buttons and see how support and resistance change
- See the state of the three markets on the dashboard `/en/dashboard`

Day 2

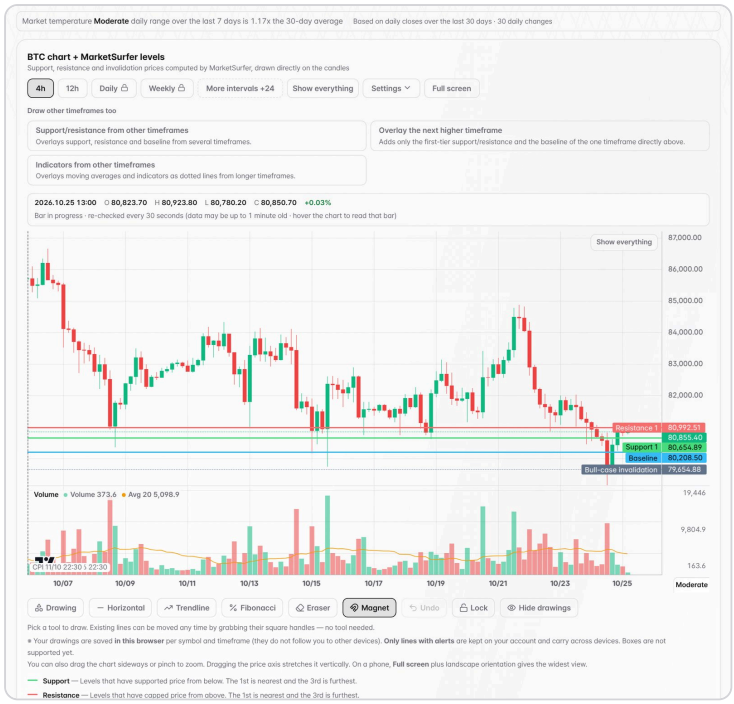

Learn the backdrop

- Fear & greed index `/en/fear-greed`
- This week's macro calendar `/en/calendar`
- Look up unfamiliar words in the 247-term glossary `/en/glossary`

Day 3

Save, connect, learn

- Sign in and save one watchlist symbol `/en/watchlist`
- Connect Telegram to get a morning briefing on your saved symbols `/en/account/telegram`
- Beginner lesson 1 "Build a Structure That Survives First" `/en/course`

Bitcoin chart — support, resistance and the baseline are drawn over the candles. The lock on the Daily and Weekly buttons marks the subscription range · 1440px wide · captured 2026-10-25

Lite · from ~~₩49,000~~ for 1 month

Daily reads and the levels of longer bars

Lite is the first step: the daily and weekly market reads and briefings, and support and resistance from the daily bar up on symbol charts. These 26 rows open on top of Free.

What opens	Where to see it
Market briefings · reports	
Today’s read + today’s plan (pivots and spots to watch) A daily note on the prices where direction splits and the zones MarketSurfer is watching.	/en/reports
This week’s market read (crypto · Nasdaq · KOSPI)	/en/reports
Daily market report (morning and evening · all markets)	/en/reports
Bar-close and session briefings (crypto six bars · Nasdaq pre/open/close · KOSPI)	/en/reports
Yesterday’s alert results	/en/reports

Market regime · macro	
FX support/resistance 1st–3rd · trend (daily and above)	/en/exchange
Market temperature — advancing share of the top 10 by turnover vs the rest, per market	/en/heatmap

What opens	Where to see it
Order book heatmap — Bitcoin, Ethereum and top markets by trading value (alts and commodities) · up to 4 hours + same-spacing clusters, co-placed orders and repeated-size order lists	/en/orderbook
Order book heatmap — Bitcoin and Ethereum · 24 hours (hourly-average resting size · includes the 12-hour view)	/en/orderbook
Education · community · web	
Lessons (2x/day, KST 09·21) + quizzes and polls	/en/learn
Course, practical track — 18 lessons	/en/course
Full education — psychology and risk deep-dives + the operator's methodology	/en/learn

Your first three days

Day 1

Start with today's read

- Read "Today's read + today's plan" under reports `/en/reports` — the reports are written in Korean
- On the Bitcoin page, press Daily and Weekly to see where the longer bars sit `/en/live/BTC`

Day 2

Put alerts on your symbols

- Save symbols to your watchlist `/en/watchlist`
- Connect Telegram `/en/account/telegram`
- When a saved symbol reaches its level you get a personal DM (up to 3 symbols a day on Lite)

Day 3

Conditions and study

- Save a condition in the screener and get new symbols by DM (up to 10) `/en/screener`
- Start the 18-lesson practical course `/en/course`

> Not in Lite: the support/resistance level table (all symbols, six bars) with reach and break alerts, the desk, derivatives and smart money, and the advanced course start at Standard.

Standard · from ~~₩87,000~~ for 1 month

The all-symbol level table and every alert

Standard lets you scan support and resistance for every symbol in one table and get alerts when a saved symbol approaches those levels. These 19 rows open on top of Lite.

What opens	Where to see it
Alerts · levels	
Support/resistance level table, levels 1–3 (six bars, 4-hour to monthly) + reach/break alerts (unlimited)	/en/levels
Full-trend closes, full list + tracking of daily support/resistance 1st·2nd·3rd hits	/en/trend-close
Watchlist S/R and pivot proximity alerts Alerts when a saved symbol nears its support/resistance or a turning level.	/en/watchlist
Spotlight top 5 leaning up/down (2x/day) + watch-price touch alerts Top 5 symbols whose timeframes align in one direction, plus an alert when price reaches the pullback level we watch.	/en/reports
Full interest-pool view (web)	/en/interest
My symbols · my levels	
Desk — what happened to your symbols today	/en/desk
Derivatives · flows · smart money	
Derivatives positioning (funding spikes and extremes · liquidation pressure · flow divergence)	/en/derivatives
Accumulation/distribution detection (daily bars and above)	/en/wyckoff
Smart money (Binance·OKX·Gate·Hyperliquid briefings + top-trader shift and new-entry alerts) Summaries of top-trader positioning published by exchanges, with alerts on sharp changes.	/en/smart-money
Volume spikes in real time (bar-close confirmed) + volatility build-up (compression detection)	/en/volume-alerts
Spot ETF flows (Bitcoin and Ethereum daily net inflows) See daily net inflows and outflows of Bitcoin and Ethereum spot ETFs, and how many days in a row, on the web. The latest summary is free.	/en/flows

What opens	Where to see it
On-chain · Hyperliquid	
Stop-order map for ETH and alts · limit-order walls · all most-active wallets	/en/wallets?view=liq
Wallet tracker, 200 wallets · detail for every wallet · last 7 days of changes	/en/wallets
Watch up to 10 wallets · alerts when a watched wallet changes a position (Telegram, web push)	/en/wallets
Market regime · macro	
Order book heatmap — Bitcoin and Ethereum · 7 days (hourly-average resting size · includes the 3-day view)	/en/orderbook
Earnings D-1 warning + result flashes (web calendar)	/en/earnings
BTC scenario tree (up · down · range)	/en/reports
Education · community · web	
Course, advanced track — 22 lessons (common · crypto · KR · US)	/en/course
Web alert archive search (original publications kept)	/en/feed

Your first three days

Day 1

Every symbol in one table

- Scan support and resistance across six bars in combined levels `/en/levels`
- See what happened to your symbols today on the desk `/en/desk`

Day 2

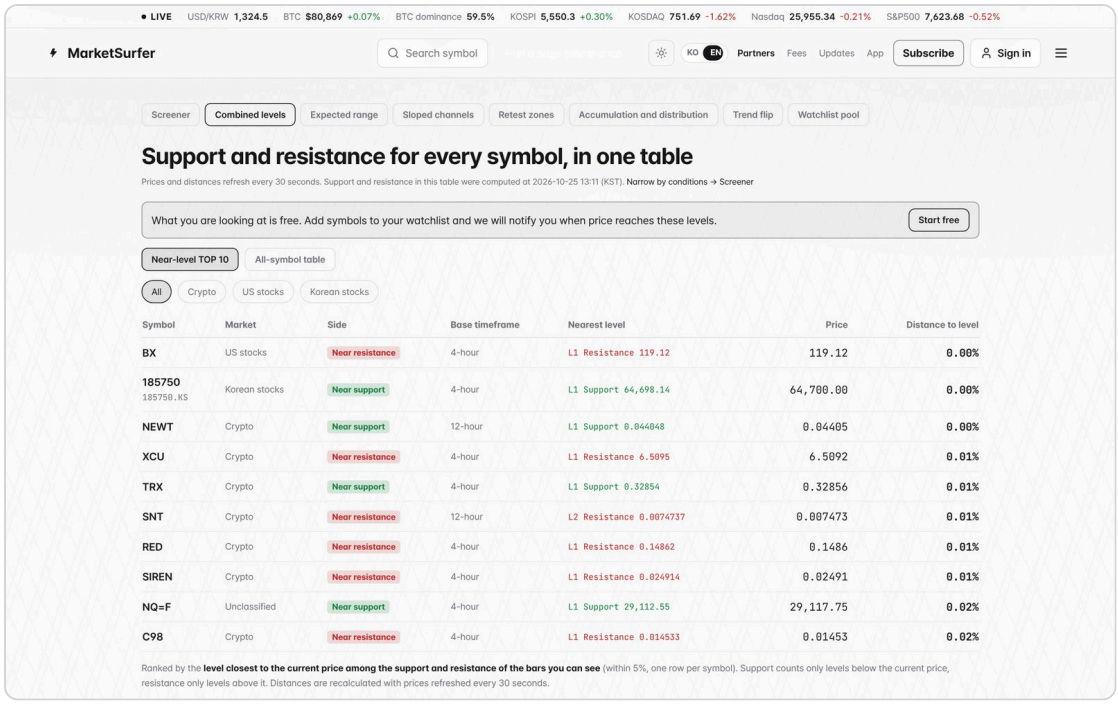

Alerts as levels approach

- You get an alert when a saved symbol comes close to support, resistance or a trend-turning level
- The full list of full-trend closes `/en/trend-close`
- The full interest pool `/en/interest`

Day 3

Reading the flow of money

- Derivatives positioning `/en/derivatives`
- Smart money `/en/smart-money`
- Accumulation/distribution detection `/en/wyckoff`
- The 22-lesson advanced course `/en/course`

Combined levels — the page as seen before signing in. Daily-and-up bars and every symbol open from Standard · 1440px wide · captured 2026-10-25

Premium · from ~~₩119,000~~ for 1 month

A person's commentary and alerts the moment they publish

Premium adds these 4 rows to everything in Standard. Instead of opening the same content on the web you receive it on Telegram as it is published, and you hear the operator's real-time market commentary.

What opens	Where to see it
On-chain · Hyperliquid	
Wallet P&L card (30-day and all-time P&L · balance · sort by period P&L) · last 30 days of changes	/en/wallets
Education · community · web	
Live commentary by the operator — the only human-run item	Telegram
Premium-only page — operator notices · today's published alerts (by grade) · Telegram channel shortcuts	/en/premium
Real-time Telegram push (same content, delivered instantly)	Telegram

> Telegram channel posts, the live commentary and alert messages are written in Korean. If you do not read Korean, keep this in mind before choosing Premium: the web pages included in Standard are where the English text is.

When the Premium-only page opens

The Premium-only page `/en/premium` opens automatically for people who are in the Premium channel. Channel membership is checked with the Telegram account connected to your MarketSurfer account, so connect Telegram first. It can take up to 6 hours to reflect.

Your first three days

Day 1

Connect and join

- Check your Telegram connection `/en/account/telegram`
- Open the channel shortcut on the Premium-only page `/en/premium`

Day 2

Learn to read an alert

- Read the five rows of "How to read a published alert" below once
- Check each alert you receive against the five "things to check yourself"

Day 3

Set how you receive them

- Choose which content to receive and set night-time quiet hours in alert settings `/en/account/notifications`
- Wallet P&L card `/en/wallets`

How to read a published alert

Direction	Shown as long or short. Long is the upward direction, short the downward direction.
Alert grade	Shown from three stars (A) down to one star (C). The grade is only a label on the alert; it does not mean a probability of success or a profit.
Tier numbers	The order of the support and resistance levels. Level 1 is closest to the reference price and level 3 the farthest. The stop is shown as the "level-3 stop price".
Confirming bar	Each alert shows the bar checked for each level together with a reference time. Please check the bar and time shown.
Prices	The entry, stop and target prices are shown. Targets are shown step by step, TP1 to TP7. Please check the prices and the reference time shown in the alert. The values are information, not an instruction to act.

Things to check yourself when an alert arrives

- Is the stop distance within the range you set for yourself?
- Is the target far enough compared with the stop distance?
- Does it point the same way as the daily and weekly direction?
- Is a macro release due within 24 hours? You can check on the macro calendar `/en/calendar`.

- Is the position size within the limit you set for yourself?

Not every alert will fit your own rules, and the final decision and its responsibility are yours. MarketSurfer does not decide for you.

> The Premium-only page opens after signing in, so this guide does not show it. If you open the address before signing in, you are taken to the sign-in page.
